

SUBHASHREE SAHOO

Senior Software Engineer | Python Backend | Django | DRF | System Design

Hyderabad, India | +91-8270249706 | subhashrees70@gmail.com | linkedin.com/in/subhashree-sahoo-83701b194

PROFESSIONAL SUMMARY

Senior Software Engineer with 5+ years of experience building scalable backend systems using Python, Django and Django REST Framework. Strong experience in REST API design, performance optimization, relational databases, Redis caching, RabbitMQ, AWS and high-volume production systems. Optimized 30+ APIs to sub-2-second response times, reduced system load time by 60%, migrated legacy Python 2.7 systems to Python 3.10, and currently lead backend delivery while managing a team of 3 developers.

CORE TECHNICAL SKILLS

Backend: Python, Django, Django REST Framework (DRF), REST APIs, OOP, System Design

Databases & Caching: PostgreSQL, MySQL, Redis

Messaging & Concurrency: RabbitMQ, Multithreading, Multiprocessing

Cloud: AWS EC2, Amazon S3, AWS Cognito, Amazon CloudWatch

Frontend: JavaScript, HTML, CSS, Bootstrap

Data & Performance: Pandas, NumPy, cProfile, Django Debug Toolbar, Query & Index Optimization

Tools: Git, Bitbucket, Mercurial, Jira

AI Tools: AI-assisted development for code analysis, debugging, optimization, documentation and developer productivity

PROFESSIONAL EXPERIENCE

Senior Software Engineer | ZestIoT Technologies

Nov 2023 – Present

- Lead backend development for high-volume aviation systems, focusing on scalable APIs, production reliability and performance.
- Designed and delivered backend modules including Audit Logs, Resource Allocation, AODB Logs, RH Form, Break Time, Manpower Analytics, FHR Reports and Airport Landing Page APIs.
- Optimized 30+ APIs to achieve sub-2-second response times through query optimization, indexing, caching and backend refactoring.
- Implemented Redis caching to reduce database load and improve API responsiveness.
- Designed concurrent processing using multithreading and multiprocessing for high-volume workloads, improving processing time and system throughput.
- Migrated legacy applications from Python 2.7 to Python 3.10 and contributed to overall system stability and maintainability.
- Manage and guide a team of 3 developers, contributing to technical decisions, feature planning, code improvements and production delivery; improved team efficiency by 30%.
- Worked with aviation clients including AISATS, Ethiopian Airlines and Fraport, supporting production requirements and client-driven enhancements.

Software Engineer | Gridlex

Sep 2021 – Sep 2023

- Built healthcare analytics systems using Medicare data with Python and Django.
- Developed a CMS Star Rating forecasting system and implemented scoring algorithms for data-driven healthcare analytics.
- Optimized APIs and application performance; performance profiling contributed to a 60% reduction in system load time.

Trainee Developer | Quickyes

Feb 2020 – Feb 2021

- Developed backend features using Django and REST APIs.
- Worked on application development, debugging and backend enhancements.

SELECTED BACKEND & SYSTEM DESIGN CONTRIBUTIONS

- **Scalable API Architecture:** Developed modular REST APIs using DRF for aviation and healthcare workflows, with emphasis on maintainability and response-time performance.
- **Database Performance:** Optimized relational database queries and indexing strategies across PostgreSQL and MySQL workloads.
- **Caching & Messaging:** Used Redis for caching and RabbitMQ for asynchronous/message-driven processing.
- **Legacy Modernization:** Migrated production systems from Python 2.7 to Python 3.10 while preserving business-critical functionality.

KEY ACHIEVEMENTS

- Optimized 30+ APIs to sub-2-second response times.
- Reduced system load time by 60% through profiling and performance optimization.
- Improved team delivery efficiency by 30% while managing 3 developers.
- Built and maintained production systems across aviation and healthcare domains.

EDUCATION

B.Tech – Electrical Engineering | BPUT, Odisha | CGPA: 7.8

Subhashree Sahoo | Senior Python Backend Developer
